Yuval Zaafrani

Automation Engineer @ Nayax | Computer Science & Entrepreneurship Student at Reichman University | Passionate about Technology, Creativity & Impact

Tel Aviv-Yafo, Tel Aviv District, Israel

Summary

I'm a goal-driven individual passionate about excellence, fostering strong interpersonal connections, and maintaining order while unleashing creativity. My diverse background spans restaurant management, military service in criminal investigations, and a current pursuit of a bachelor's degree in Computer Science and Entrepreneurship at Reichman University.

Currently, I work as an Automation Engineer at Nayax, where I apply my skills in Python, test automation, and API testing to help deliver reliable, high-quality software. I enjoy blending logical problem-solving with creative thinking—whether through code or real-world collaboration.

In addition to my academic and professional journey, I've embraced the culinary arts, creating private chef meals for individuals in the comfort of their homes. This experience, paired with my background in restaurant management, has taught me to innovate, adapt quickly, and always aim for memorable, human-centered experiences.

I've also expanded into the digital landscape with a comprehensive course in digital marketing, driven by a passion for staying at the forefront of innovation, product thinking, and user experience.

Away from work and studies, I find joy in the melody of music, playing the piano, and staying active in sports. And of course, there's nothing better than winding down with a good glass of wine. Let's connect and share ideas, passions, and possibilities!

Experience

Nayax

Automation Engineer

May 2025 - Present (5 months)

Herzliya, Tel Aviv District, Israel

As an Automation Engineer at Nayax, I develop and maintain automated test frameworks and scripts to ensure the stability and performance of our payment and telemetry systems. My work includes writing and executing end-to-end and integration tests, identifying bugs early in the development cycle, and collaborating closely with developers and QA to improve product quality. I work on-site in Herzliya as part of a dynamic and agile team, constantly optimizing our automation coverage and tools.

Israel Defense Forces

Criminal Investigator

2018 - 2020 (2 years)

Tel Aviv District, Israel

Completed two years of military service. I served as an investigator for drug offenses, violent offenses, fraud and forgery offenses and sexual offenses in the army.

Throughout my service, I earned multiple certificates of excellence.
