Yuval Zaafrani

Automation QA Engineer @ NAYAX | B.Sc. Computer Science & Entrepreneurship Student at Reichman University | Bridging Technology, Quality & Innovation

Tel Aviv-Yafo, Tel Aviv District, Israel

Summary

I am a Computer Science & Entrepreneurship student at Reichman University and an Automation QA Engineer at NAYAX, passionate about building reliable software, driving innovation, and creating meaningful impact.

My background is diverse and multidisciplinary: from military service as a criminal investigator, through hands-on experience in restaurant management and private chef services, to my current role in the fintech and IoT industry. This journey taught me adaptability, analytical thinking, and the ability to merge creativity with structure. At NAYAX, I design and maintain automation frameworks, implement Python-based test scripts, and conduct API and integration testing to ensure high-quality, stable systems. I thrive in dynamic, agile environments, collaborating closely with developers and product teams to enhance product reliability and accelerate release cycles. Academically, I combine rigorous computer science training (operating systems, machine learning, data structures, etc.) with entrepreneurial studies (venture capital, product management, innovation strategy, etc.). This dual degree allows me to approach challenges from both technical and business perspectives. Beyond tech, I find inspiration in music (piano), sports, and culinary arts, always seeking to connect creativity with human-centered experiences.

Let's connect to explore opportunities, share ideas, and innovate together!

Experience

Nayax

QA Automation Engineer

May 2025 - Present (5 months)

Herzliya, Tel Aviv District, Israel

- * Develop and maintain automated test frameworks for fintech and telemetry systems.
- * Write and execute end-to-end, integration, and API tests to ensure product reliability.
- * Identify and report bugs early in the development cycle, strengthening product stability.
- * Collaborate with developers, QA, and product teams in an agile environment.
- * Expand automation coverage and optimize tools integrated into CI/CD pipelines.

Israel Defense Forces

Criminal Investigator

2018 - 2020 (2 years)

Tel Aviv District, Israel

- * Conducted investigations into drug offenses, violent crimes, fraud, forgery, and sexual offenses.
- * Collected evidence, prepared case files, and collaborated with law enforcement agencies.
- * Earned multiple certificates of excellence for professionalism and dedication.

Education

Reichman University

B.Sc., Computer Science & Entrepreneurship · (2023 - 2026)

Danon - Culinary School

Associate's degree · (2021 - 2022)

Hadarim High School

High School Diploma, Physics · (2015 - 2018)
